Thank you for consulting us about this application; consequently we have reviewed the detailed information contained on your website.

As you may remember we previously commented this application in our letter dated 11th September 2017, where we noted that in our opinion the proposed works are unlikely to impact on any buried archaeological resource.

Furthermore, the reserved matters in the current application do not include archaeological conditions or constraints and therefore we have no further comment to make at this time.

If you have any questions or require further advice on this matter please do not hesitate to contact us.

Yours faithfully
