

View 3 - Existing - View looking south east from Marconi Avenue, with Tesco supermarket in the foreground. The existing buildings within the site are partially visible, glimpsed through and above the woodland.
 Proposed - The proposed development will be substantially screened by the woodland, although when visible the smaller scale of development will present a more harmonious built form.

View 4 - Existing - View looking south from Terra Nova Way, opposite entrance onto zig zag path up through woodland. The woodland provides considerable screening and local enclosure, even in winter with only glimpsed views available through to the existing buildings on site.
 Proposed - The proposed development will be partially screened by the vegetation, with woodland management proposals providing a more open canopy.
