Project:

Client:

Title:

Notes:

BS8102:2009

4.2 All design decisions made by others that might have an impact on the waterproofing design should be brought to the attention of the waterproofing specialist / designer and installation contractors. Final decisions and any recommendations should be approved by the designer.

6.2.4 The need for continuity in the waterproofing protection should also be considered when selecting a type of protection. In most circumstances, the protection should be continuous.

PREPRUFE - Pre-applied wall membrane
PREPRUFE 800PA - Post applied wall membrane

Support options:
PREPRUFE placed on smooth sound substrate, insulation or void former system

Wall options
PREPRUFE or PREPRUFE 800PA used in conjunction with insulation and or Hydroduct drainage system

All connections to dpm on blinding are suitable for vapour/moisture proofing only

Suitable qualified and experienced Engineers or Architects should carry out the design and site supervision of below-ground structures
