

Construction (Design and Management) Regulations
 Design risk assessments are carried out throughout the design stage of this project. In accordance with the Construction (Design and Management) Regulations, 2007, the design team has identified areas of the application to the design team and any to be taken into consideration when developing their design or assessing work items. These are the general areas of work a competent designer or contractor should be aware of and are not included. This drawing is to be read in conjunction with the safety plan and all relevant documents prepared in accordance with current Construction (Design and Management) Regulations and all subsequent amendments.
