Dear Sirs

Please accept my apologies for not responding earlier to your letter dated 30th Sept. 2014, this has been due to the contractor awaiting information from manufacturers.

I enclose the following:-

A revised drawing of the window frame in bay window.

A specification of the PVCu construction.

We are still awaiting the aluminium spec. which I will forward to you on receipt.

I confirm that the front elevation windows are white aluminium.

I am happy to omit the diamond lead effect on the top window panes.

I trust that you will find the above satisfactory (subject to the aluminium spec)

Yours faithfully

John J Adams MBE

Hello Mr Adams ,

Please find attached a plan of your bay.

PVCu Specification:

-

Linear 70mm Lead Free virgin sculptured profile with no visible glazing (black) gasket. 70mm frame section, re-inforced where necessary to manufacturers recommendations. Aluminum reinforced PVCu corner posts. Four internal hollow channels in the window profile for added strength and insulation. Multipoint locking with lockable handles. Internal glazing bead for security. 28mm Low Energy Planitherm Total Argon Gas filled double glazed units with a warm edge spacer bar for extra insulation, Internal cill boards and all finishing included. A-Rated.

Aluminium Specification:

-

White powdercoated smart alitherm 600 series, thermally broken. Internally glazed openers and externally glazed fixed. Multipoint locking with lockable handles. Low Energy Planitherm Total Argon Gas filled double glazed units with a warm edge spacer bar for extra insulation.

Kind Regards,

Mark
