Dear Sirs

Re: WPD Proposed Overhead Line Works at Old Coal Yard, Gileston, St Athan.

Electricity Act 1989: Overhead Lines (Exemption)(England and Wales) Regulations 2009

Please find attached a plan showing WPD proposed works at Court Coleman.

Western Power Distribution has been requested to divert part of the existing high voltage overhead network in preparation for a proposed housing development at this location. Following this request, Western Power Distribution will be required to **divert part of the overhead network and lay an underground cable** to replace the dismantled overhead network. The design includes erecting a double pole construction and associated underground cables on the boundary of the development within the existing verge. The stay wires required on this pole will be positioned within the development. I can confirm that permission has been granted from all land owners to enable us to carry out this work.

of the
existing
Act 1989

I understand that the above works are covered within The Overhead Lines (Exemption) (England and Wales) Regulations 1990 although there is a requirement to inform the Local Planning Authority.

Whilst I note that this work is exempt from the requirement for formal planning permission I would be pleased to learn that your Council has no objection to the work being carried out by returning two copies of this Form with the Certificate completed and signed.

The purpose of this letter is to advise you as to our proposal and to give your Council the opportunity to comment. In the absence of any such notification we will programme works accordingly.

I trust that this is in order and I should be pleased to receive your observations.

Yours sincerely

Nigel Jones
