

Proposed restoration area will be screened, even from this elevated and open location, by intervening sloping landform and mature vegetation

A4232 in well-vegetated cutting provides a barrier between the urban fringes of Cardiff and the agricultural and wooded landscapes of the Vale

Viewpoint 3: From bridge over A4232

It will only be from a few very limited open locations within Cardiff that the proposed restoration area has the potential to be perceived on the distant wooded ridge. However a combination of distance as well as retained woodland vegetation will ensure the proposed restoration area will be difficult to perceive

A48, that passes through Cardiff, is largely enclosed by surrounding development

Viewpoint 4: From minor road (Parker Road) off A48, within Ely
