

It will only be from a few very limited open locations within Cardiff that the proposed restoration area has the potential to be perceived on the distant wooded ridge. However a combination of distance as well as retained woodland vegetation will ensure the proposed restoration area will be difficult to perceive although glimpses of the access road may be possible, depending on the time of year

It is only from selected open locations within the built-up landscape of Caerau that more exposed views into the wider landscape are possible

Viewpoint 5: From junction of Heol Trelai and Heol Solva, within Caerau

It will only be from a few very limited open locations within Cardiff that the proposed restoration area has the potential to be perceived on the distant wooded ridge. However a combination of distance as well as retained woodland vegetation will ensure the proposed restoration area will be difficult to perceive although glimpses of the access road may be possible, depending on the time of year

It is only from selected open locations within the built-up landscape of Caerau that more exposed views into the wider landscape are possible

Viewpoint 6: From Trelai Park, within Caerau
