Dear Mr. Howell,

APPLICATION FOR
Regeneration and Planning
TREE TENTS - WOODS, DE HAMLET

I have lived at Ham Manor Park for 21 years and during that time have never seen an inspection of the trees on the woods, consequently many have fallen to the detriment of residents living adjacent to the woods. Would the same lack of care and consideration apply should this proposal be granted.

What about the wild life, only today in my garden were two woodpeckers, a bluejay, a bird of prey in the tree and a blue tit nesting in my box at the edge of the woods. What becomes of these birds together with the hedgehogs and badgers.

Toilet facilities would not be manned causing filth and smells. We all have large Calor Gas cylinders close to the woods which could be a waiting fire hazard should careless use of fires be used.

Isnt it enough that we have to put up with the continuous mess and ridiculous heavy vehicles from the farmer without even more traffic. This was meant to be a Retirement Park but certainly doesn't fit that category.

Thank you for any assistance you can help with

Yours sincerely
