**Subject:** Proposed Wakeboarding facility at Cosmeston Lakes

Dear Mr Bird

We are writing to you because we are appalled at the proposed wakeboarding facility at Cosmeston Lakes. We often visit the park to take a leisurely, peaceful walk around the lakes. It is ideal for us with our mobility problems. We sit at watch the birds, and squirrels, and listen to the birdsong. It is idyllic.

However, I feel that the proposed facility will be detrimental to the park in every way. Not only will the noise spoil the peace and tranquility, it will affect the water fowl. The proposal to site the pylons and cableway along the eastern end of the Western lake is directly in the path of the waterfowl as they make their way between the two lakes.

The park is a nature reserve with sites of special scientific interest, so surely this proposal goes against all that that stands for.

We have placed our objections on the planning page, but wish to let you know our objections as well.

Yours

Lesley and Michael Young
