

Area of regenerating scrub / thicket containing Ash, Alder, Blackthorn, Hawthorn, small Oak and Bramble. No discernable hedge line

2.5m high Mature hedgerow on a associated 1.2m high roadside embankment. Hedgerow is well maintained and in good condition. Species comprise Hawthorn, Blackthorn, Blackberry, Ash, Sycamore, Holly, Elm & Clematis vitalba. Ground flora species include Hart's tongue Fern and Ivy. Likely an Important Hedgerow as defined by the Hedgerow Regulations 1997

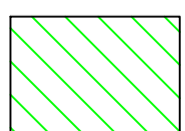

Area of regenerating scrub / thicket with a high percentage of standard Elm now predominantly dead. Hedge line is no longer discernable. It is Recommended that this area is cleared and replaced with new native hedgerow to match the other side of the access

Newly planted native hedgerow of predominantly Hawthorn with some Hazel
