

# The Derw

The Derw (oak) is a 6 person glamping pod which is made up using a moduLog ty haf and moduLog mini linked together face to face. This configuration creates a lounge area and kitchen area which turn into sleeping areas at night for up to 6 people.

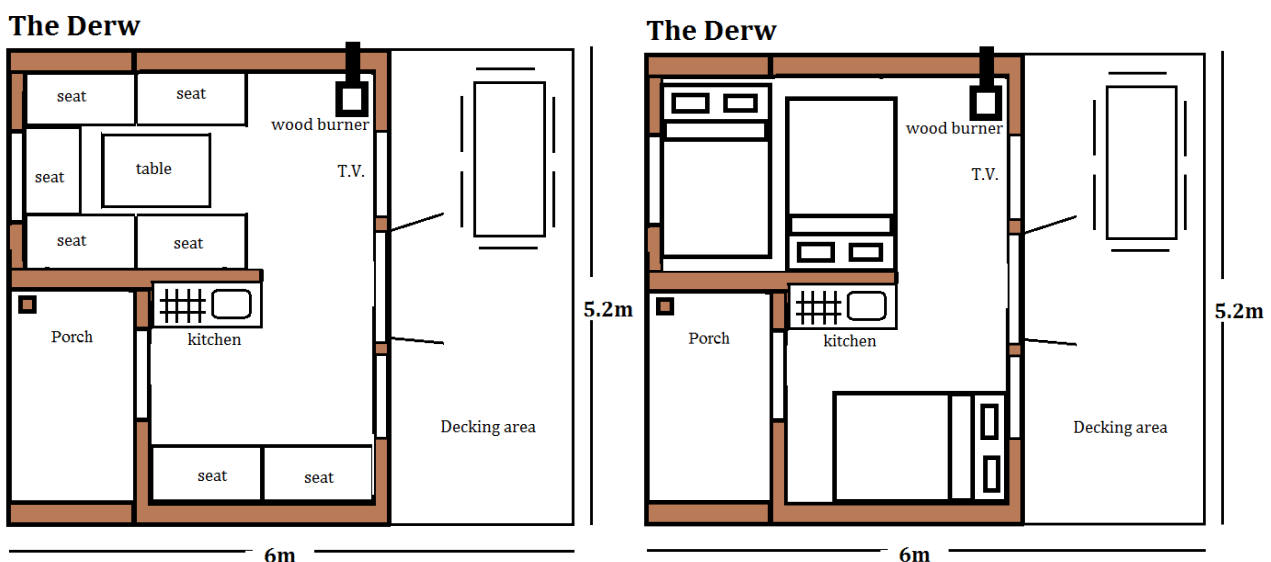

It has a covered porch area and glazed French doors leading onto an outdoor decked area with a full height glazed windows.

As with all moduLog pods and garden rooms the Derw is fully insulated and weather proof for all season use.

This design can easily accommodate an electric heater or a log burning stove if required and there are different cladding and window options available to make it your own.

The porch is an ideal covered area for dirty footwear and coats.

Each Derw comes complete with decking area.
