

The Bedw

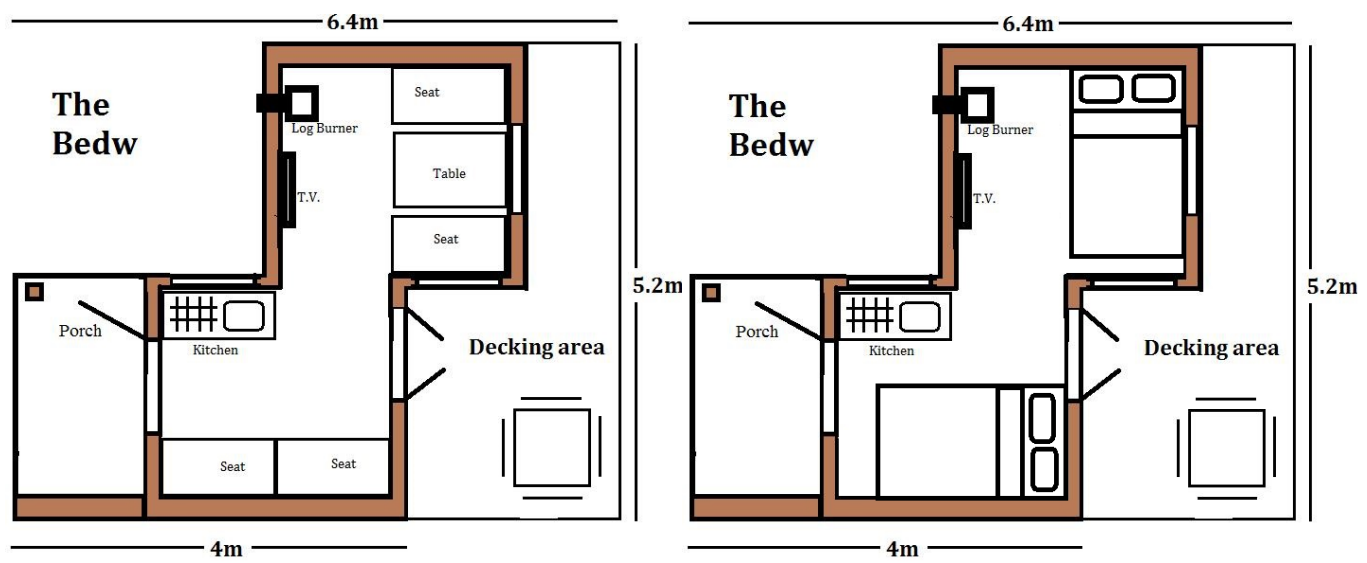

The Bedw (Birch) is a 4 person glamping pod which is made up using a moduLog micro and moduLog mini linked together face to face offset. This configuration creates a lounge area and kitchen area which turn into sleeping areas at night. Bunk beds can be built in if required.

It has a covered porch area and glazed French doors leading onto an outdoor decked area with a double glazed oak window. As with all moduLog pods and garden rooms the Bedw is fully insulated and weather proof for all season use.

This design can easily accommodate a log burning stove or electric heater if required and there are different cladding and window options available to make it your own.

The porch is an ideal covered area for dirty footwear and coats.

Each Bedw comes complete with decking area.
