Subject: Your ref PLA0030925- Barry Port Biomass Plant, David Davies Road, Barry

FAO Sion Jones,

I write with respect to the above mentioned application and your comments dated 14th November 2017, our reference 2017/1080/FUL.

In your previous comments you did outline that Welsh water offer no comments on the application to vary conditions 5 and 19 subject to maintaining drainage related conditions on any new consent granted for the development, namely conditions 13, 14, & 27. But indicate that you may want to comment further if the application is altered.

I wanted to make you aware that in view of the application being a variation of the original permission, details of the sustainable drainage conditions attached to the original permission (2015/00031/OUT) have now been included with the application for consideration rather than conditioning the details again. As such, the Council drainage engineers are in discussion with the applicant regarding the scheme submitted but I wanted to update you in this regard so that Welsh Water may consider the applicant's scheme and provide observations if you wish to do so.

If you have any queries then please contact me,

Kind regards

Morgan Howell
