

Creation of extension reedbed/swales throughout EIA site, providing new habitat for protected/notable species and facilitate their continued dispersal across the site

Creation of wetland habitats increasing opportunities for protected/notable species and providing biodiversity gain

Creation of extension reedbed/swales throughout EIA site, providing new habitat for protected/notable species and facilitate their continued dispersal across the site

Maintenance/enhancement of wildlife links north to south through the EIA line

New planting to reinforce existing hedgerow and woodland boundaries, maintaining integrity and strengthening wildlife corridors

Orchard providing further benefits to recreation and biodiversity whilst promoting links to nature

Public rights of way sensitively located along existing infrastructure to minimise habitat loss and maintain integrity of habitat

Retention of existing woodland with minimal breaks to facilitate construction of a link road

Maintenance/creation of wildlife links east to west along northern boundaries of EIA site

Creation of wetland habitats increasing opportunities for protected/notable species and providing biodiversity gain

Outdoor GYM

Re-routing Costal Path at proposed park and rewild existing costal path

Section with low height vegetation along Costal Path to allow views to Bristol Channel

Enhancement and supplementary planting of existing hedgerow to strengthen the ecological network and facilitate dispersal of protected species north to south

Community Gardens – further diversifies recreational opportunities enhancing health and well being of a new community

Creation of wetland habitats in compensation for loss of arable land, increasing opportunities for protected/notable species and providing biodiversity gain

Public rights of way sensitively located along existing infrastructure to minimise habitat loss and maintain integrity of habitat

Nature Play

Retain mature trees where possible

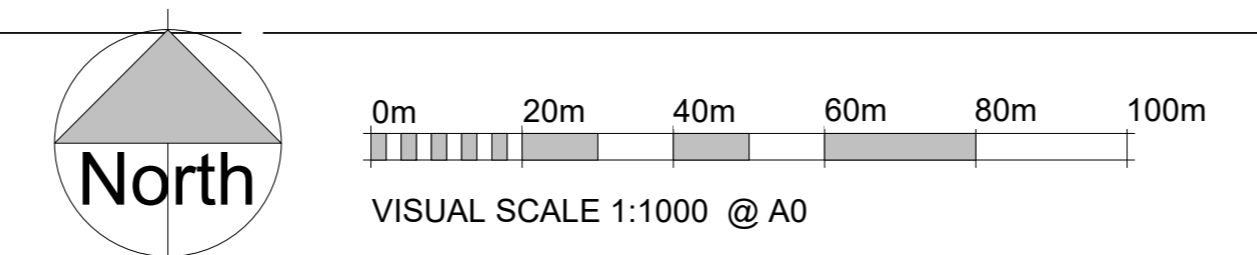

Maintenance/creation of wildlife links east to west along southern boundaries of EIA site

KEY

	Retained hedgerow	30 750m ²
	New hedgerow	13 700 m ²
	Retained mature vegetation	560 m ²
	Retained hedgerow maintained at 1-1.5m height	1260 m ²
	Grass/meadow, orchards or community gardens	19 800 m ²
	Private gardens soft landscape	17 000m ²
	Wetland habitat; SuDS swales and infiltration basins	24 940 m ²
	Water & Wetland habitat: Attenuation pond (surface area)	1700 m ²
	Dormouse crossing point utilising existing and proposed tree canopies	
	New habitat connections	
	Retained mature tree	
	Pedestrian passages designed for unobstructed wildlife movement	
	NEAP (Neighbourhood Equipped Area for Play) approx. area 1400m ²	
	LEAP (Local Equipped Area for Play) 01-1100m ² , 02-620m ² , 03-570m ²	
	LAP (Local Area for Play) approx. area 120m ² each
