

Distances in metres

Key

- Standard scaffold poles
- Heavy gauge 2 m tall galvanized tube and welded mesh infill panels
- Panels secured to uprights and cross-members with wire ties
- Ground level
- Uprights driven into the ground until secure (minimum depth 0.6 m)
- Standard scaffold clamps

(Please check all RPA's on site.)

#### Key

Trees to be considered for retention.

- A - High
- B - Moderate
- C - Low
- Root Protection Area

Trees unsuitable for retention.

- U - Fell

#### Tree Key

- Crown Spread. Measured in North, South, East and West side of tree.
- Tree number. (T - Individual Tree, G - Group, A - Tree area, W - Woodland, H - Hedgerow)

**Root Protection Area (RPA)**  
A layout design tool indicating the minimum area around a tree deemed to contain sufficient roots and rooting volume to maintain the tree's viability, and where the protection of the roots and soil structure is treated as a priority.

This plan should be read in conjunction with the Cardiff and Vale College- Weycock Cross Tree Survey & Categorisation Report May 2023 (Ambler SJ.)

The original of this drawing was produced in colour. A monochrome copy should not be relied upon.
