Notes:

Whilst every reasonable effort has been taken to correctly record the pipe material of DCWW assets, there is a possibility that in some cases pipe material (other than Asbestos Cement or Pitch Fibre) may be found to be asbestos cement (AC) or Pitch Fibre (PF). It is therefore advisable that the possible presence of AC or PF pipes be anticipated and considered as part of any risk assessment prior to excavation

Dŵr Cymru (Welsh Water) gives this information as to the position of its underground apparatus by way of general guidance only and on the understanding that it is based on the best information available and no warranty is made by the Company in respect of the accuracy of the information. The user of this information is responsible for its use and for any excavation or other works made in the vicinity of the Company's apparatus. The user of this information is advised to consult the Company's records and to take appropriate precautions before carrying out any excavation or other works. The information is supplied to the user on the understanding that the user is responsible for its use and for any excavation or other works made in the vicinity of the Company's apparatus. It should be noted that the records that are available to the Company may not disclose the existence of a water main, service pipe, sewer, lateral drain or disposal main and any associated apparatus laid before 1 September 1989, or of any other apparatus which is not shown on the map. It must be understood that the furnishing of this information is entirely without prejudice to the provisions of the New Roads and Street Works Act 1991 and the Company's right to be compensated for any damage to its apparatus. Service pipes are not generally shown but their presence should be anticipated.
