Dear Sir

Re: Proposed Siting of Self-Storage Containers and Associated Works (Class B8): Land on Hayes Road, Sully.
Pl.App.No.: 2023/00708/FUL.

Thank you for consulting us regarding this application; consequently, we have reviewed the detailed information contained on your website.

Information in the Historic Environment Record does not note any archaeological features or artefacts within the redline boundary itself. Historic mapping sequences from the early 19th century onwards note quarrying activity in the vicinity.

Given our understanding of the nature of a potential archaeological resource, and the proposed development, it is our opinion that it is unlikely that any significant archaeological remains would be encountered during the course of the development.

We therefore have no archaeological objection to the application; but note that the Historic Environment Record is not definitive, and should archaeological deposits be encountered please contact us as mitigation may be required.

If you have any questions or require further advice on this matter, please do not hesitate to contact us.

Yours faithfully

Judith Doyle
